### Stations & Parallel Tracks

#### Description:

These are introductory combinations that are easy to put together. They show how to setup multiple track lines parallel to each other (for example for a train station). Complex layouts are made of layout "snips". It is important to know that these layout snips are then put together to make more complicated layout. Building these "snips" and then joining them with others is one of the first steps in learning how to build wooden train track layouts.

Note: Please note that this layout was achieved using MeskoToys tracks and may not be feasible otherwise.
